ARTFORM APOLLO

DESCRIPTION

The Apollo Cycle Stand, can by used as a pedestrian bollard, is manufactured from extruded aluminium. From the front, fixed on both sides is a shaped steel plate, upon which it is possible to add aesthetical timber, stainless steel or RAL colour coated plates. A 3mm laser shaped cap finishes off the top of the structure. All metal parts are cold galvanised and polyester powder coated. Fixings are stainless steel.

ARTFORM BOLA

DESCRIPTION The Bola's understated design doesn't conflict with other site elements. The cycle stands are manufactured from 38mm diameter 3mm wall stainless steel tubing, with a satin electropolish finish. Bola is also available in powdercoated steel. The cycle stand has the potential to secure two bicycles parked parallel to the stand. The bicycles can be headed in opposite directions, or in the same direction. The rack provides two-point contact to prevent the bicycle from tipping over. A standard D-shaped bike lock can secure both a wheel and the frame.

ARTFORM
CAFE CYCLE

DESCRIPTION

The Cafe Cycle Stand has an interesting design with two semicircles side by side, it is made up of an 8mm thick corten steel sheet structure, with a base plate prepared for ground fixing with suitable ground fixing anchors (not included). The stand is sandblasted and treated with a unique oxidisation cycle fine-tuned by Metalco. The Cafe Cycle Stand is also available in mild steel powder coated finish.

ARTFORM CICLOS

DESCRIPTION

The Ciclos Cycle Rack is constructed from a 20mm diameter tubular steel frame which is formed into a spiral to create the main frame. The frame is then attached to two horizontal steel tube bars. The structure undergoes a process of being sandblasted and polyester powder coated and then attached to the concete support. In both cases the structure is fixed to the supports thanks to the special precast aluminium attachments provided with the appropriate anti-theft keys. Available in stainless steel.

ARTFORM
CIRCLE CYCLE

DESCRIPTION

The Circle cycle stand is manufactured from machine folded tubular steel with an integrated designed to attach bikes or to display logos. The stand is available as surface mount and comes with pre-drilled elliptical base plates. Alternatively inserts for in-ground concreting are available in tubular steel with threaded plates to be fixed in the base plate. The Circle Bike Rack can also be used as a modular barrier.

ARTFORM CLOS

DESCRIPTION

The Clos Cycle Stand is manufactured from steel. Its composition is made from two laser cut steel sheets and is coupled with a spacer. The Clos can be customised with any writing or logo as the upper part of the sheets can be laser cut to any desired motif. The Clos can also be used as a modular barrier.

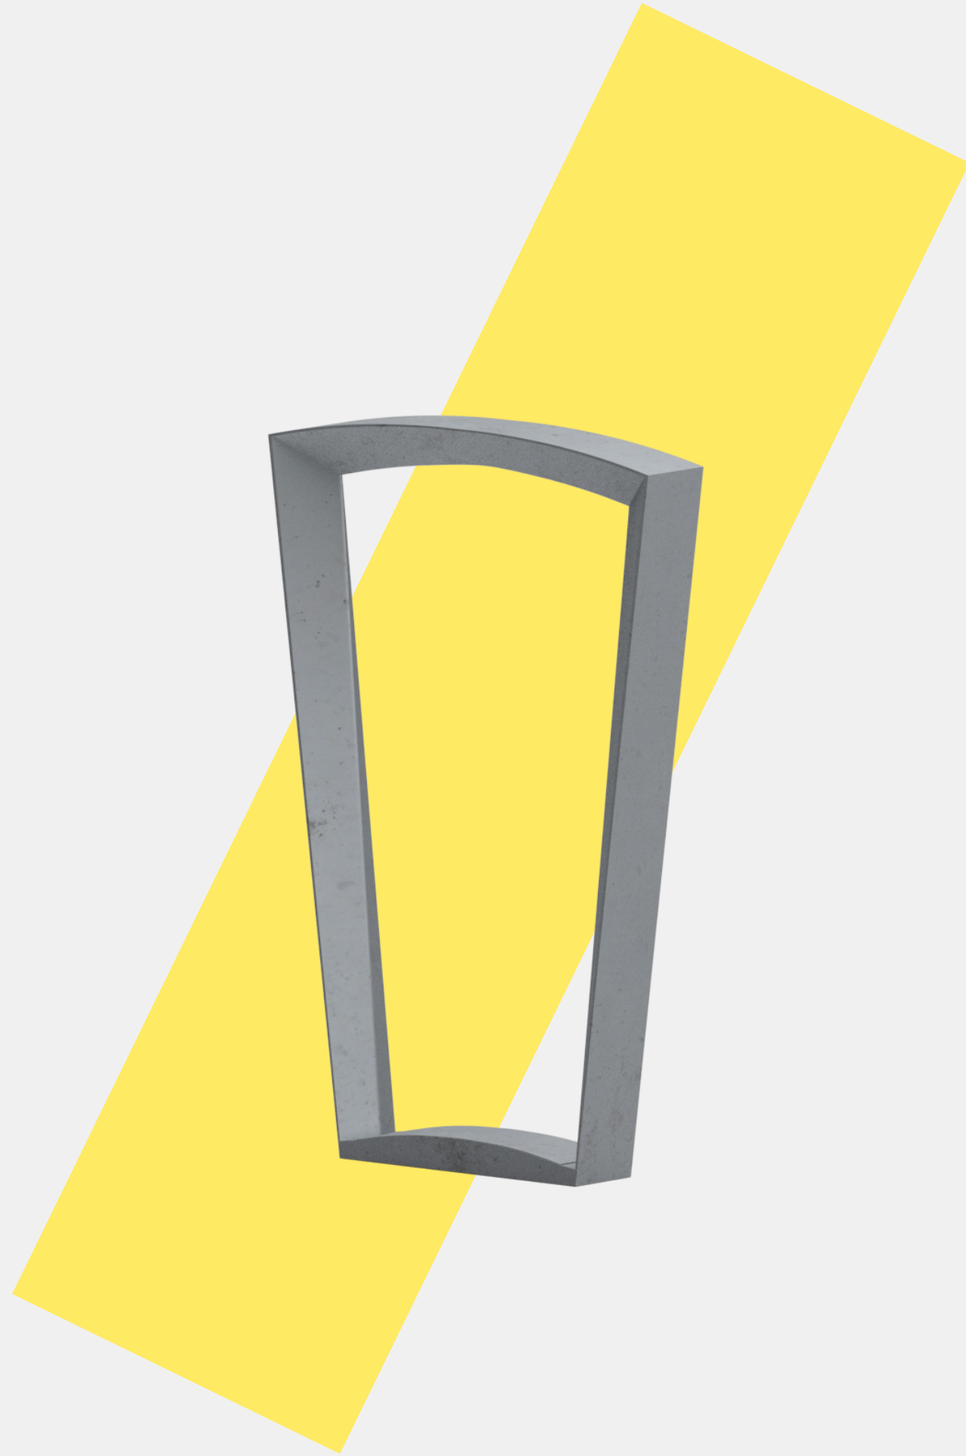
ARTFORM EMERSON



DESCRIPTION

The Emerson cycle stand is fit for a variety of bicycles. Tapered from top to bottom with crisp edges and beveled detail, the stand has concealed hardware and pre-installed stainless steel levelling guides, and meets APBP guidelines. This cycle stand has been manufactured with high traffic areas in mind with its space spacing and durability characteristics.

ARTFORM FLO

DESCRIPTION

Flo can secure three bicycles parked parallel to the rack. The bicycles must alternate directions. If access is limited to one direction, the capacity is reduced to two bicycles. The rack provides two-point contact to prevent the bicycles from tipping over. Flo's flowing design secures 3 bicycles and accepts a horseshoe style lock.

ESCOFET
BICI-N

DESCRIPTION

Bici-N is the universal bicycle parking model that cyclists prefer. It responds to a design that facilitates the safe parking of two bicycles in each element, with the possibility of securing the frame and wheels separately.

ESCOFET
RAVAL

DESCRIPTION

The Raval bicycle stand is associated with the new urban mobility criteria that predominate in large cities. Its design permits two bicycles to be attached safely at three points. The triangular cross section of the element optimises its resistance to stress caused by impact and bending and it has an internal stainless steel frame.

MMCITE BIKEBLOCQ

DESCRIPTION

A simple frame finished with a horizontal wooden element perfectly supports the bicycle, which can be parked on both sides. The bike stand is tilted at the same angle as the feet of the Blocq bench, so it fits perfectly alongside the rest of the range. It works just as well as a standalone installation as it does next to other pieces of street furniture, always looking and working great.

MMCITE GOMEZ

DESCRIPTION

A stand with a minimalist circular form for a unique side profile. It is composed of a pair of materials: a galvanised steel frame on the inside, with an external coating of durable rubber. The ring is seated in a subtle cast aluminium bracket. The stand is strong enough to support your bicycle but soft enough not to damage it. A simple circle with no superfluous decorations, works perfectly in any architectural context, in all possible situation, whether it is installed individually, in small groups, or in long rows for a subtle interplay of circular forms.

MMCITE MEANDRE

DESCRIPTION

Double-sided bicycle stand with a completely new, unique design and a distinctive, naturally elegant shape, unusually gentle on the bicycle. A characteristic meander made of a durable rubber belt gently clasp the front or rear wheel of any size. The steel pipe which is running through the rubber meanders is there to lock the bicycle.

MMCITE VELO

DESCRIPTION

Very practical, durable bicycle stands of advanced modern design fully fulfilling their function. Thanks to their robust yet elegant shape, they can be well received even in a high-end environment. Velo bicycle stands are available in single-sided and double-sided versions.

MMCITE BIKEPARK

DESCRIPTION

Bicycle stand working with a clear meaning of the letter P, the shape of which it humorously uses for a purely functional solution. It is part of the whole system originally installed in car parking spaces on the streets. It looks great as a stand-alone piece as well as installed in groups.

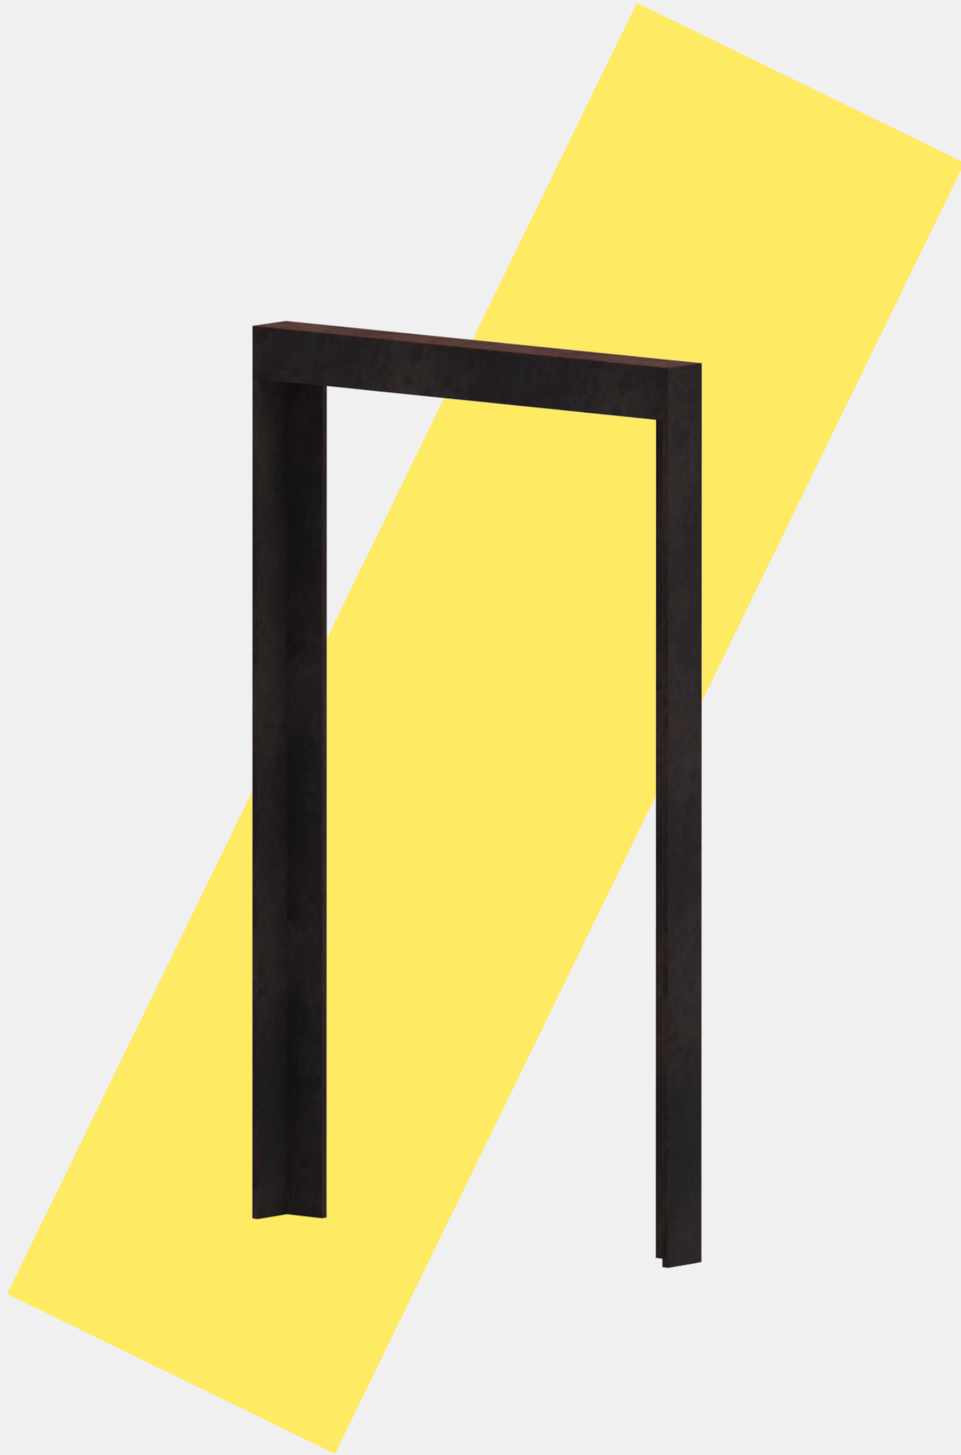
MMCITE LOTLIMIT



DESCRIPTION

The modest bicycle stand, based on the Lotlimit railing design family, works with the most basic morphology, a combination of L-profiles, which makes it easier to incorporate into any project. It communicates very well with both contemporary and historical architecture.
